11:55 – 12:00	Key Takeaways and Closing	Invest-NL

JICE Online Webinar Series 2026

Textiles, 30th of June 2026

Recycling, EPR schemes, industrial models and finance

- Review of the **state of progress of the circular economy in the textile sector**, covering existing business models, emerging recycling solutions and Extended Producer Responsibility (EPR) schemes.
- Examination of the **economic and financial challenges** limiting the large scale deployment of circular textile models along the value chain.
- Discussion of **capital needs, investment gaps and perceived risks** from the perspective of investors and financial institutions active in the sector.
- Sharing of **practical experiences and case studies** from market operators, start ups and organisations managing circular textiles design, life extension, and end of life streams.
- Objective of the webinar: **to build a shared knowledge base** that supports a more effective dialogue between industry and finance and helping to design better policies and financial tools for a circular textile sector.
